

Benjamin

JUNIOR DEVELOPER

My name is Benjamin Halász. I am a young and open minded man of action with many unique ideas.

I have started studying Java language in 2018. At that time I gave up my old career and I have been focusing on program developing 6-8 hours on a daily basis.

Developing and creating value is not only my best loved hobby but something that worths the time and effort. Program developing is the field where I want to become successful. Seeking opportunities to leverage developer skills set in as junior developer.

PROFILE

Name	Benjamin Halász

I am currently holding a part-time position as System Administrator at BlueNet Bt where I am mainly responsible for deploying softwares, maintaining networking tasks. At the same time I am holding another part-time position at Warren and Bull Ltd as external advisor so that I can keep focus on the software development. I am ready to start working as Junior Developer where I can grow and express myself. I am a hard working person and I really want to create value in this field. I am an energetic person and I am not afraid to meet new kind of tasks as I can rely on my experiences that I obtained in the past few years. I believe in agile software development and I am ready to learn new technologies. I am also interested getting involved in "Mentor-program" improving my developer skills and see how deep water looks like. See my ref.:
